### Corpus

Development of this publication has made use of the Cambridge English Corpus(CEC). The CEC is a computer database of contemporary spoken and written English, which currently stands at over one billion words. It includes British English, American English and other varieties of English. It also includes the Cambridge Learner Corpus, developed in collaboration with the University of Cambridge ESOL Examinations. Cambridge University Press has

built up the CEC to provide evidence about language use that helps us to produce better language teaching materials.

### **English Profile**

This product is informed by English Vocabulary Profile, built as part of English Profile, a collaborative program designed to enhance the learning, teaching and assessment of English worldwide. Its main funding partners are Cambridge University Press and Cambridge Assessment English and its aim is to create a 'profile' for English, linked to the Common European Framework of Reference for Languages (CEFR). English Profile outcomes, such as the English Vocabulary Profile, will provide detailed information about the language that learners can be expected to demonstrate at each CEFR level, offering a clear benchmark for learners' proficiency. For more information, please visit [www.englishprofile.org](http://www.englishprofile.org).

### **CALD**

The Cambridge Advanced Learner's Dictionary is the world's most widely used dictionary for learners of English. Including all the words and phrases that learners are likely to come across, it also has easy to understand definitions and example sentences to show how the word is used in context. The Cambridge Advanced Learner's Dictionary is available online at [dictionary.cambridge.org](http://dictionary.cambridge.org).
