Section 5: Reading

Read the article. Notice the underlined words. Then choose the correct words or phrases to complete the definitions.

The power of positive thinking

All of us have hopes and dreams for the future. Maybe we'd like to do better at work or we're dreaming about starting a new business. The difference between achieving and not achieving those goals is how we look at life. Those who have a positive attitude are more likely to complete those goals than those who have a negative attitude. That is the power of positive thinking.

Increase positive thinking

Positive thinking does not mean that you don't look at the negative parts of life. To be positive, change your attitude about those negative things. We all have a voice inside our heads, like we are talking to ourselves. This is often called our self-talk. It's the voice which tells you that you can't do something when you have a problem. With positive thinking, you try to alter this voice to be more positive. Instead of saying you have a problem, you tell yourself you are going to have an interesting challenge to solve.

Decrease negative thoughts

All of us have negative thoughts. Sometimes we don't even know it. For example, we all have times when we are convinced something bad will happen. Perhaps you are going to go to a party, and you think you are going to have a bad time or say something stupid. With positive thinking, you tell yourself all the good things that you would like to happen at the party. You could make new friends. Instead of thinking about the stupid things you might say, you focus on the interesting things people will tell you.

How to begin

First, identify the parts of your life you would like to change. For example, at work, your home life, or your health. Choose one of those areas and decide to make a difference. Try to find a way of thinking about this area in a positive way. Once you do this, you can move on to another. Step-by-step, you are going to make a more positive you!

30. When you achieve a goal, you (**plan / complete / start**) it.
31. If you alter something, you (**change / stop / follow**) it.
32. If you are convinced about something, you are (**excited / sure / not sure**) about it.
33. When you focus on something, you (**forget / think only / don't think**) about it.
