

Authors' thanks

The authors would like to thank all those at Cambridge University Press who have made valuable contributions to the development of the second edition of Super Minds:

Our editors, Ester Ribera Marimon, Pamela Fernández Sánchez, Helen Macrae and Angela Wilde for their enthusiasm for the project, their constructive feedback and many valuable suggestions. Special thanks go to Rosemary Bradley, Commissioning Editor, for inspiring discussions about teaching and learning that have had a very positive influence on the development of the educational concept of the second edition, and for overseeing the development of the whole project. Justyna Matwiejczyk for her enthusiasm that has helped us to stay in touch over the years with many colleagues and students using the first edition so successfully, and Oliver Escritt for adding important views on the needs of colleagues from countries the world over.

Kay Bentley for developing the Think and learn syllabus, Colin Sage for mapping the Critical and Creative Thinking activities, Kiki Foster for evolving video content and Laurence Koster for overseeing the development of the teacher's components.

We would like to thank Caroline Thiriau, Business Unit Director Primary ELT at the Press, for her leadership and support that we believe will make the second edition even more successful than the first one.

A big thank you goes to colleagues and teachers in many countries around the world for their enthusiasm when working with the first edition of Super Minds, as well as their feedback and suggestions. We are grateful for many inspiring discussions, interviews and permission to observe classes. Thanks for helping us to shape the most innovative and exciting features of the second edition.

Our thanks go to the educational consultants, representatives, managers and directors working for Cambridge University Press in the UK and in many countries around the world.

The publishers would also like to thank Ms Dong Zihan of the Foreign Language Teaching and Research Press, PR China, for initial feedback on the project.

Acknowledgements

The authors and publishers acknowledge the following sources of copyright material and are grateful for the permissions granted. While every effort has been made, it has not always been possible to identify the sources of all the material used, or to trace all copyright holders. If any omissions are brought to our notice, we will be happy to include the appropriate acknowledgements on reprinting and in the next update to the digital edition, as applicable.
