

## **Conversation Pair Work Cards**

### **For the Teacher**

The Conversation Pair Work Cards are designed to offer an alternative approach to the “Now You Can” Pair work at the end of Lessons 1 and 2 of each unit of the Student’s Book. Each conversation model is divided into two cards: one with Student A’s part and one with Student B’s part, with blank spaces in which each student can personalize his or her part. In this way, students get guided practice and an opportunity to manipulate each model, using their own words and ideas, thus making key social language unforgettable. They are a great way to get students “out of the book” to more actively converse with each other.
