Learning Strategy
(Unit 1, page 10, Reading)

READING STRATEGY: scanning

Learn how to scan an article. When you scan, you don't read every word in the article—just look for the words that will answer your questions.

For example, to complete the chart on page 11, you only need to look for the pieces of information that answer the following questions.

1. What is each person's occupation?   3. What is each person's hometown?

2. Where does each person live?   4. Is each person married or not?

In the articles below, the unimportant words have been deleted.
