

Writing Process Worksheets

For the Teacher

The Writing Process Worksheets are step-by-step guides that students can use to complete the writing tasks in the Student's Book. Each includes a prewriting activity to generate ideas and a feedback checklist for peer feedback and editing. You can choose to do both activities or either one alone.

Encourage students to revise their writing and to see writing as a process in which they improve what they've written with each draft. Focus on the expression of ideas. Save correction of errors for the final draft.
